Dear Toyota Boshoku Canada Inc,

I am excited to apply for the Quality Control Co-op position with Toyota Boshoku Canada Inc. As an Honours Physics student at the University of Waterloo, I have developed strong analytical, problem-solving, and technical skills that align well with quality assurance and manufacturing environments.

Through my role as an AI Trainer, I regularly review complex information, identify inconsistencies, and ensure documentation meets strict quality standards. This work requires a high level of accuracy, attention to detail, and independent decision-making. In my physics coursework, I have gained experience working with laboratory equipment and technical procedures while developing a disciplined approach to data collection, verification, and analysis.

In addition, my experience as Assistant Manager at Moo's Ice Cream Shop strengthened my organizational and communication skills. I used Excel to analyze operational data, improve scheduling efficiency, and support process improvements. Working in a fast-paced environment taught me how to manage competing priorities while maintaining accuracy and reliability.

I am particularly interested in the opportunity to support quality audits, documentation management, and process verification activities at Toyota Boshoku. I am eager to contribute my technical mindset, attention to detail, and strong work ethic while gaining experience in manufacturing quality systems. I am also able to work at either the Elmira or Woodstock plant as I am from Wellesley and grew up going to the syrup festival in Elmira. Thank you for your time and consideration, and I look forward to discussing my qualifications further.

Sincerely,
Seagar Grubb
